

## The solvers

### Team Aim:

Valorizing waste/by-products of traditional dry pasta production

### Team Members:

Carmine Forte (Left)  
Alessandro Ippolito (Bottom right)  
Andrea Berardo Di Marco Sbaraglia (Bottom left)

### Affiliated Company:

Rustichella d'Abruzzo

### Institution:

University of Teramo

### GROUP DESCRIPTION

We are Carmine, Alessandro and Andrea, and together we are the "the solvers" group. We are very determined food technologists with an eclectic cultural background due to the differences related to our bachelor theses. These are respectively based on the interaction between *Listeria monocytogenes* and Lactic Acid Bacteria on biofilm formation, precision techniques application on durum wheat, and on the study of insects and how it can protect the living cell. With the high problem-solving skills and knowledge in the microbiological and chemical fields developed during our experiences, we are ready to solve problems at the industrial level.

### Team Leader

Carmine Forte
